THE NEW WORLD
WHY STUDY AT ISTANBUL MALTEPE UNIVERSITY?

Maltepe University strives for academic and social leadership in one of the best located and equipped campuses in Istanbul Turkey. At present our University comprises of 9 faculties, 3 institutes, a vocational school, a nursing school and School of Foreign Languages. We have over 5,500 enrolled students and 600 academic staff members.

We are a member of the European University Association (EUA)
We offer an internationally recognized degree
We provide academic excellence
We have experienced and specialized academic staff
Our programs are supported by a wide-range of modern academic infrastructure (a library, laboratories, and an information center)

www.maltepe.edu.tr
Maltepe University is situated in the Marmara Education Village, one of the largest (100 square hectares) campuses in Turkey. Being only half an hour away from the upbeat and dynamic tempo of the metropolitan life of Istanbul, yet situated in the midst of a tranquil pine forest, the campus provides an ideal environment for study and research.

The University operates at two other venues: The Vocational School in the Dragos Campus on the Marmara shoreline. The School of Medicine in downtown Maltepe.

There are Student Residence halls within the Marmara Education Village which can accommodate more than 500 students, all of which are within easy walking distance to the faculties, sporting facilities, restaurants and the campus itself is a 15 minute journey from Maltepe’s urban center. The dormitories are equipped with kitchenettes, laundry facilities, computer rooms, cafes, study rooms and internet access. There is a medical centre on campus which provides psychological counseling and 24 hour health services free of charge.

There is a wealth of social facilities, providing excellent opportunities for study, enterprise, learning, socializing, sports and recreation, such as:

- concert halls
- amphitheater
- exhibition halls
- greenhouse and hobby gardens
- Olympic swimming pool
- indoor and outdoor basketball and volleyball courts
- tennis courts
- badminton court
- gymnasium
- billiard hall
- fitness center
- ice skating rink
- cinema
- guest recreational facilities
Studying at Maltepe University puts you right in the heart of Istanbul, with its unique cultural mosaic. It is the only city in the world which joins two continents. The Bosphorus bridge is a cross-over between not only Asia and Europe but also the old and the new world.

Istanbul is crowned with districts that reflect the essence of its cosmopolitan history in its every corner. There are a variety of ways to explore and enjoy Istanbul, depending on individual tastes and preferences. With countless museums, castles, mosques, and churches, and with its fascinating and diverse thousand-year history, Istanbul offers much to reward the curious traveler.

Old meets new in Istanbul it is your call to explore both at Maltepe University
Maltepe University itself offers a wide range of activities to its students, including participation in traditional events and extracurricular activities, such as clubs and sports designed to enrich students’ cultural perspective.

- Guidance Symposium
- Theater Festival and Competition
- Concerts
- Cinema evenings
- Sports Tournaments

Some of our student clubs are Dance, Photography, Music, Chess, Movie, Theatre, Nature Sports and Cartoon Making.
UNDERGRADUATE PROGRAMS

FACULTY OF EDUCATION
- English Language Teaching Program
- Guidance and Psychological Counseling Program
- Preschool Teacher Education Program
- Elementary Mathematics Teacher Training Program
- Teacher Education for Mentally Disabled Students
- Teacher Education for Gifted Children

FACULTY OF ARTS AND SCIENCES
- Philosophy
- Psychology (English)
- Social Work
- Sociology

FACULTY OF ECONOMICS AND ADMINISTRATIVE SCIENCES
- Banking and Finance
- Economics
- Business
- International Relations and European Union (English)
- International Trade and Logistics Management (English)

FACULTY OF MEDICINE
- Medicine

NURSING SCHOOL
- Nursing

FACULTY OF COMMUNICATION
- Visual Communication and Design
- Public Relations and Publicity (English)
- Radio, Cinema and Television
- Journalism

FACULTY OF ARCHITECTURE
- Architecture
- Interior Design
- Nautical Design

FACULTY OF ENGINEERING AND NATURAL SCIENCES
- Computer Engineering (English)
- Electrical-Electronics Engineering
- Industrial Engineering
- Software Engineering (English)
- Civil Engineering
- Energy Systems Engineering

FACULTY OF LAW
- Law

GRADUATE PROGRAMS

GRADUATE SCHOOL OF SOCIAL SCIENCES
- Management in Education and Auditing (mandatory thesis)
- Philosophy of Education (mandatory thesis)
- Ethics and application of ethics (mandatory thesis)
- Philosophy (optional thesis)
- Philosophy and Social Policy (mandatory thesis)
- Marketing Communications (optional thesis)
- Interior Architecture (optional thesis)
- Banking and Financial Economics (without thesis)
- Economics (optional thesis)
- Human Rights (optional thesis)

GRADUATE SCHOOL OF SCIENCE
- Computer Engineering
- Electronics Engineering
- Industrial Engineering
- Financial Engineering
- Structural Earthquake Engineering
- Mathematics
- Architecture
- Restoration

POST GRADUATE PROGRAMS (PhD)

GRADUATE SCHOOL OF SOCIAL SCIENCES
- Philosophy
- Economics
- Communication Studies
- Psychology

GRADUATE SCHOOL OF SCIENCE
- Computer Engineering
- Architecture
To be respected in the national and international arena in the fields of education, science and technology producing, to be active in research, to have preferred graduates, to be capable of finding solutions to the problems of professional life, and to be an academic institution which has gained respect with these aspects and has an important place among other higher education institutions.

Our mission is to educate competent, knowledgeable and productive high-level engineers who can both contribute to the global development of science and technology, produce projects that will accelerate the need for modernization of our country, and work effectively in existing similar projects.

Education at the Engineering and Natural Sciences Faculty of the Maltepe University is designed and based on the specific principles and supported by modern laboratories and equipment. Template and memorization learning are absolutely avoided. Instead, our engineering education follows a curriculum based on creative and analytical thinking, improving initiatives, motivating leadership and team work.

**Academic Activities**
- Engineering Faculty Seminars Series (Weekly)
- Career’s Day Certificate Programs

**Departments**
- Civil Engineering
- Computer Engineering (English)
- Electrical-Electronics Engineering
- Energy Systems Engineering
- Industrial Engineering
- Software Engineering (English)
To train innovative and competent teachers and psychological counsellors, who are equipped with theoretical knowledge, field skills and experiences and are capable of thinking freely and critically.

To train contemporary, intellectual teachers who are endowed with an awareness of social issues and who can put theoretical knowledge into daily practices.

- Faculty of Education is one of the first among the several Foundation Universities
- It consists of highly professional, experienced, and distinguished academic staff
- Graduates have job opportunities in a variety of educational institutions and organizations

**Academic Activities**

- Youth and Guidance Symposium
- Learning Experiences and Youth: Get-togethers
- International English Language Teaching Conference

**Departments**

- English Language Teaching Program
- Guidance and Psychological Counseling Program
- Preschool Teacher Education Program
- Elementary Mathematics Teacher Training Program
- Teacher Education for Mentally Disabled Students
- Teacher Education for Gifted Children
Academicians of our faculty support both their own students and students of other faculties in becoming individuals who have the ability to think critically / analytically. Also support students who can find solutions to problems, are aware of ethical principles and apply them caringly; are aware of their social responsibility of consuming not only the limited sources of their country but also the ones of the world, make decisions for themselves and update themselves continuously.

The students of the faculty are given theoretical training in the fields of Philosophy, Mathematics, Psychology, Social Work and Sociology; additionally they gain practice through active participation and implementations in the research centers that have been established in our university. Students are also guided by the faculty members to establish and join the social clubs such as conferences, workshops and awareness raising activities, which ensure that students improve themselves both scientifically and socially / personally.

- Competent and up to date education programs.
- Students who have satisfactory grade averages have the opportunity to study in two fields through double major and minor programs.
- Relevant master’s degree and doctoral programs are available within the frame of Graduate School of Social Sciences for the students who want to continue their education.

**Academic Activities**

- Conferences on Philosophy
- Social Responsibility Works Student Symposium
- Sociology Days
- Human, Social Sciences and Philosophy Symposium
- The Balkan Countries Symposium of Philosophy

**Departments**

- Philosophy
- Psychology (English)
- Social Work
- Sociology
Our vision is to enhance our reputation as a nationally and internationally respected institution that offers quality education, genuine scientific works, creative activities and highly equipped academic staff.

Maltepe University Faculty of Law aims to:

- Prepare people who would like to learn and practice law for professional life’s difficulties based on competition, hands provide them with the information and experience necessary to generate solutions to all sorts of legal problems.
- To develop competent and confident individuals in every discipline of law and reaching up to international standards of perfection.
- Contribute to the development of law by supporting scientific works.

The factors taking our Faculty one step ahead are:

- Our academic staff which consists of not only experienced but also dynamic members
- Both theoretical and application oriented education
- Various exchange opportunities with several universities across Europe under ERASMUS program
- Moot court practices
- Student visits and observations to different nearby courts
- The Faculty’s physical conditions which provide highest standards with it’s lecture rooms and necessary equipment to fulfill needs.

Academic Activities

National and international conferences and symposiums which are held every year, student visits and observations to different nearby courts and our graduation ceremony which is celebrated in great enthusiasm are amongst some of the events that take part in our Faculty.
FACULTY OF ECONOMICS AND ADMINISTRATIVE SCIENCES

We keep educating national and international leaders in their areas contribution to competitiveness through education and research. In this respect, our main goal is to educate the future leading professionals and academicians who uphold universal values, who are creative, innovative, sensitive to social and environmental problems and who are capable of making decisions to shape the future.

To educate highly qualified individuals for the benefit of the society in the fields of science, education and services. In the contemporary world where human capital is becoming increasingly important, our faculty is aiming to educate students who can compete globally, who are sensitive to world problems, who can think critically and offer creative solutions. In this respect, our goal is to make our faculty an institution which will present a model nationwide and worldwide.

- Educational opportunity at the cross-road of the cultures
- Global leader development seminars
- Entrepreneurship oriented curriculum
- Special emphasis to International Trade and Logistics
- Analytical approach to common problems
- Effective decision making
- International relations focus group
- Close to international banking and finance center

Academic Activities
- The Eighth International Trade and Logistics Conference

- Journalism
The purpose of education in our faculty is to give students foundational skills sought in the fields of today’s architecture, interior architecture and nautical design. Our goal is to teach students independent thinking in line with contemporary developments and to provide knowledge and technology applicable to practice.

We have a wide number of academicians who are individual experts at their fields of research.
We have dynamic teamwork in which experienced staff are supported with dynamic young fellows.
In comparison to the other institutionalized architectural schools nationwide, especially with our facilities for education, we have made a notable progress in 13 years.
Increase in the quality of education due to facilities like computer labs, application workshops, model workshops and material workshops.
Each student has a table and a cupboard in theme of the design studio atmosphere, and this also endorses the quality of education.
We are gathering our students and experts at our university on Wednesday Seminars.
As a part of the Erasmus Intensive Program we are participating in workshops.
We are contributing to the society with our students by doing projects in the fields of architectural and urbanism preservation.

All three departments in our faculty give priority to such principles and are staffed with competent professors and lecturers. Our curriculum has also been planned with an approach compatible to current technologies by:
- fostering analytical thinking in order to identify, shape and solve problems,
- giving sufficient design and synthesis to create, develop and operate effective systems,
- teaching how to lead social changes by comprehending artistic, economic and industrial trends,
- giving insight to renewal and emphasizing importance of lifelong self-education

Departments
- Architecture
- Interior Design
- Nautical Design

Academic Activities
- (Bilateral Agreement) Student and Teaching Staff Exchange with Varna Free University Department of Architecture.
- International Workshop in cooperation with Stuttgart University of Applied Sciences FH.
- Wednesday Seminars.
- ‘International Diploma Project Festival from Architectural and Civil Engineering Schools of Eurasia’
- ‘Office Furniture Design for different cultures’ in Office Expo 2011 Istanbul
FACULTY OF MEDICINE

To provide health care: within contemporary norms and standards at the highest quality at every level via academic education and by respecting patients and physicians rights.

Academic Activities

- MIMSCON 2010 Maltepe University International Medical Students Conference
